PROFILE

Frontend Developer with 2+ years of professional experience shipping production websites and web applications with React.js, Next.js, TypeScript and Tailwind CSS. Builds client websites end to end at Sama & CO; previously built an internal landing page builder at ShootOrder. Strong in reusable components, REST APIs, authentication, state management, SEO and Core Web Vitals.

EXPERIENCE

Frontend Developer — Sama & CO, Hyderabad — Jan 2026 – Present

- Delivered client websites end to end with Next.js and Tailwind CSS, working directly with clients from requirements to Vercel deployment.
- Deliver solutions across healthcare, construction, interior design and real estate, using reusable components and a maintainable project structure.
- Implement responsive, SEO-friendly pages, lead-capture forms, Google Sheets integrations and UTM campaign tracking.

Web Developer — ShootOrder, Hyderabad — Apr 2024 – Dec 2025

- Built production-ready, responsive frontend applications with React.js and Next.js for marketing and campaign use cases.
- Developed Landers, an internal component-based landing page builder that lets non-technical teams create and manage pages without code.
- Optimized mobile responsiveness, SEO and Core Web Vitals across dynamic pages, improving page performance by 40%.
- Received the ShootOrder Excellence Award for strong ownership and delivery excellence.

Full Stack Development Trainee — Newton School — Feb 2023 – Apr 2024

- Completed an intensive MERN stack and DSA program; built React projects using React Hooks, Zustand and Context API for complex state.
- Strengthened problem-solving through weekly coding contests and DSA practice; ranked top 5 among 300+ participants.

PROJECTS

Landers — Dynamic Landing Page Builder — Live Link

Next.js · React.js · Tailwind CSS · REST APIs · UTM Tracking

- Built reusable, data-driven page sections that non-technical users configure through a backend interface instead of new frontend code.
- Integrated REST APIs (GET, POST, PUT, DELETE) and managed complex state for dynamic content and configurable forms with dynamic fields.
- Captured UTM parameters with form submissions for campaign attribution and analytics.

Al-Hind Infra — Real Estate Website — Live Link

Next.js · React.js · Tailwind CSS · Google APIs · Google Sheets

- Built a responsive real estate site with reusable components and dynamic pages for each project.
- Connected inquiry forms to Google Sheets via Google APIs for lead capture, with UTM tracking for campaign attribution.

Reddit Clone — Community & Social Posting App — Live Link

React.js · Chakra UI · REST APIs

- Implemented authentication and authorization so logged-in users can create communities and posts, like and comment.
- Integrated REST APIs for app data and built light/dark themes with Chakra UI components.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3
Styling & UI: Tailwind CSS, Chakra UI, Responsive Design, Reusable Components
State Management: React Hooks, Zustand, Context API
